

# Other Clients

---

Even if you don't have a client with a specific tutorial, you can most likely use it with WizMailer. Please enter the following settings in your mail client when configuring your account.

## **IMAP Client**

Incoming mail server:

Outgoing mail server: smtp.mailanyone.net

Outgoing port: 2500 imap.mailanyone.net

SMTP Authentication: Enabled

Root Prefix Path: INBOX

## **POP3 Client**

Incoming mail server: pop.mailanyone.net

Outgoing mail server: smtp.mailanyone.net

Outgoing port: 2500

SMTP Authentication: Enabled
